

Collateral Mapper

Optimise collateral potential and portfolio efficiency

Collateral Mapper unlocks the full potential of your collateral portfolio by analysing asset allocation and maximising revenue opportunities. Our intuitive dashboard simplifies complex collateral usage reports and provides clear insights into the value of your assets.

- **Efficient allocation:** Easily identify and decide securities allocation that are available and accepted by receivers, ensuring a streamlined and error-free process.
- **End-of-day analysis:** Benefit from analysis of concentration limits and residual capacity, as well as historical views of capacity evolution and collateral utilisation.
- **Holistic view:** Gain control with a consolidated view of your contracts and associated eligibility rules.
- **Enhance your collateral management processes** and increase operational efficiency with Collateral Mapper.

The screenshot displays the Collateral Mapper interface. At the top, it shows 'Total Collateral Allocations in USD' with four categories: Debt (2.87M), Equity (335.36K), Fund (335.36K), and Cash (335.36K). Below this are filters for Contract, Collateral Gover, Collateral Account, Asset Type, Collateral Receiver, and Source Account. The main section is titled 'Collateral Exposure Breakdown' and contains a large table with columns for Contract, Allocated Amount, Capacity (estimated), Total Contract Amount, Residual Capacity, and Util. Rate. The table is split into Debt and Equity sections. At the bottom, there is a 'Baskets Detailed Overview by Allocations' table with columns for Coll. Receiver, Coll. Account, Contract, Basket Id, Basket Ref, Rule ref (elig), Conc. short name, Rule ref (conc), Asset Type, Allocated Amount, Capacity (estimated), Residual Capacity, Total Contract Amount, and Util. Rate.

Contract		Allocated Amount		Capacity (estimated)		Total Contract Amount		Residual Capacity		Util. Rate	
229079	3,395.98	3,395.98	3,395.98	0.00	100.00%

244930	10,404.13	10,404.13	10,404.13	0.00	100.00%						
Total	2,865,205.11	3,197,307.34	3,197,307.34	335,356.26	89.83%	335,356.26	386,728.97	412,351.26	73,200.66	82.55%	

Key features and benefits

Leverage our innovative solution to streamline your collateral management and realise revenue-generating opportunities by maximising use of lower-grade collateral as a cost-effective alternative to pledging assets.

- **Greater portfolio transparency:** Monitor assets across all available markets and track asset flows.
- **Comprehensive collateral exposure breakdown:** Gain a detailed view of all contracts across participant codes. Identify opportunities to optimise collateral allocation based on utilisation rates.
- **Eligibility and concentration rules:** Understand detailed basket-level rules to identify collateral optimisation opportunities. Gain insights into concentration limits and residual capacity analysis to efficiently navigate constraints and make informed decisions.
- **Customisable dashboard:** Provide asset type breakdowns and historical trends down to a D-1 snapshot of your collateral allocation details over the last 30 days. The dashboard consolidates EOD data from both CmaX and Swift sources.
- **Capacity and asset utilisation:** Review historical capacity trends and asset utilisation, broken down by asset type.
- **Security holdings breakdown:** View asset positions linked to source accounts to take necessary action.
